

Point of Care at its Simplest HbA1c and ACR

SIMPLE

FAST

RELIABLE

The Afinion™ AS100 Analyzer System is designed for point of care testing and is for *in vitro* diagnostic use only.

ADA Guidelines for HbA1c

The American Diabetes Association (ADA) recommends that someone with diabetes be tested for HbA1c a minimum of two and up to four times per year. Diabetes Control and Complications Trial (DCCT) findings show that people with diabetes who keep their HbA1c levels close to 7% or below have a much better chance of preventing and/or delaying diabetic problems (i.e., heart, nerve, eye and kidney damage).

ADA & NKF Guidelines for ACR

In addition the ADA also recommends annual screening of ACR in patients with Type 1 diabetes for a duration of ≥ 5 years and all Type 2 diabetes patients, starting at diagnosis and during pregnancy. The National Kidney Foundation (NKF) recommends that screening of diabetes should include measurement of Urinary ACR in a spot urine sample.

3-Minute HbA1c Test CLIA-Waived

As Easy as 1 - 2 - 3

1 - DRAW

2 - INSERT

3 - RUN

SIMPLE

- Factory Calibrated
- Ready-To-Use Controls
- Operator-Free System Check

FAST

- Three-Minute HbA1c Test Time

RELIABLE

- National Glycohemoglobin Standardization Program (NGSP) Certified
- Accurate results traceable to the International Federation of Clinical Chemistry and Laboratory Medicine (IFCC) and Diabetes Control and Complications Trial (DCCT)

Current Tests Available

- HbA1c – CLIA-waived
- Albumin/Creatinine Ratio (ACR)
